

TWO OF GERMANY'S PRINCIPAL DEMANDS REJECTED BY ALLIES

Reply to Counter Proposals Refuses Request for Mandate for Former German Colonies; Reparation Sum Not Fixed, But For Assured Arrangement Workable; Treaty to Be Altered Less Than Supposed.

PARIS, France, June 11.—(By the Associated Press.)—The reply to the German counter proposals agreed upon by the peace conference heads, which the German request for a mandate for the former German colonies, it was learned today.

A lengthy memorandum gives the reasons for the refusal and explains the operations of the league of nations on colonial matters.

The reparations portion of the reply, which has been completed and has reached the printer, does not fix the total sum which the Germans must pay. The text of the treaty itself is not changed, but the reply contains assurances to Germany regarding the method of the reparations process, explaining that it is a workable arrangement.

President Wilson fought strenuously to include a fixed total sum in the reparations clause and the close of the discussion leaves him unchanged. It is said, in the belief that the reply as formulated.

Official announcement was made after the meeting of the council of four Tuesday afternoon that there was hope of a unanimously early decision in the reply to Germany.

It was said an agreement, in principle, was reached on the reparations clause to the effect that no definite sum to be paid by Germany will be fixed in the treaty and that the question would be left virtually as in the original draft.

In French circles it was stated that the treaty as finally submitted to the Germans will be much less altered than has been generally supposed.

It was indicated that France was still determined not to agree to any material changes in the treaty.

World War For From Loan.

President Clemenceau is expected to firm in his refusal to agree to the admission of Germany to the league of nations immediately. The French hold that they understand German psychology better than their allies and realize that the increasing anxiety of the Germans during the last few weeks means that they appreciate how hard this arrangement would be imposed if the peace conference should yield to the German demands for immediate admission to the league. The French, it is understood, are willing that the Germans should be admitted later but insist that this admission must not be in compliance with what

New Mex. Mayor Greets Erwin Via New Radio

Motorcycle Outfit Makes Fast Run to Alamogordo And Sends Messages.

What promises to win the approval of the war department and recognition for the seventh field signal battalion at Fort Bliss, is the new radio motorcycle outfit, designed and built by the battalion, which has been pronounced an unqualified success. A recent test of the wireless station operated from a motorcycle, at Alamogordo, N. M., convinced officers of the signal corps that the new device is entirely practical.

The trip to Alamogordo was made last Saturday. The run of 105 miles was made over the Twin Mills road, in heavy traffic and by a seven hour run was required for the trip.

Stable conditions were met on Saturday morning, and on Sunday morning, the other cleared and at 1 o'clock the men began sending messages to Fort Bliss.

Major O'Driscoll, of Alamogordo, sent to Brig. Gen. James B. Connelley, at the following message: "Congratulations upon the successful completion of the new radio motorcycle outfit."

Other messages were sent to Fort Bliss which the operators there declared came in clearly and with such force that they were able to read the headlines and still get the messages.

The airline distance to Alamogordo is more than 80 miles and the results obtained on the trip of the outfit, in sending a distance of 200 miles, may be considered a record.

From the motorcycle radio sets, Capt. Neil Hanning, Lieut. Paul Neal and Lieut. Charles H. Hanning, enlisted men, constituted the party which made the Alamogordo trip.

The return trip, a distance of 105 miles, was completed in four hours and five minutes traveling time, and demonstrated that the machine will be able to operate successfully in cross country runs. A new gasoline storage tank arrangement will enable such machines to run enough for a 200 mile trip. The two cases on the return trip from Alamogordo, however, used only five and one-quarter gallons of gas.

Devise Means Big Savings.

The new outfit consists of two motorcycles and three men and will replace the old fashioned pack sets of men, men, horses and three mules.

The savings in personnel and force is expected to constitute an economy which will appeal to officials in Washington. Under the old plan the outfit of even one mule would throw the entire set out of commission, whereas the new outfit, which is a motorcycle, the new set was smashed, the entire outfit would be able to keep in communication with other stations.

The principal feature, consists of a specially designed side car, so arranged that the sender and receiver apparatus and the kit, while the generator is mounted on the rear of the machine. The generator is a new set, is driven entirely by the power of the motorcycle, while the old style machine was operated by four men with an annual amount of labor.

Broad Record for Speed.

A radio hole 40 feet long is carried in ten sections and recently in practice the outfit set up a complete plant, stepping from fast speed and sending messages in 15 seconds, breaking the world's record for setting up a radio plant. The former record, set by the outfit, was 27 seconds and the record was held by the machine.

Further Tests Planned.

It is the plan of the commanding officers of the seventh field signal battalion to take the new outfit a distance of approximately 150 or 200 miles from the camp for the purpose of further demonstrating its ability to send over long distances. During the coming week the outfit will be set up at Fort Bliss and messages will be sent to the radio company at Santa Fe, a distance of more than 100 miles.

With the success of the working model proved, it is expected that when specifications and a report on the new outfit are sent to Washington, the result will be extensive motorizing of the radio outfit, which will make them particularly adaptable to the southwest.

CAPT. ELY IS VISITOR.

Capt. Clyde Ely, formerly in command of the 15th machine gun battalion, who recently was discharged at Presidio, Calif., is visiting in this city.

Two bottles of Tanlac did me more good than anything else," he says.

"After I had spent every cent realized from the sale of my home, and several hundred dollars besides, in trying to recover my health, two bottles of Tanlac did more good than anything else," he says.

GERMAN ENMITY GROWS

Additional Clashes Occur at Coblenz; American Wounded Others Are Wounded.

Coblenz, Germany, June 11.—(By the Associated Press.)—Hostility between the American soldiers and the German civilians in the occupied region, which has been increasing recently, has resulted in additional clashes during the last few days. In one instance an American was killed and in other encounters in various parts of the occupied zone several Americans were wounded.

The trip to Alamogordo was made last Saturday. The run of 105 miles was made over the Twin Mills road, in heavy traffic and by a seven hour run was required for the trip.

Stable conditions were met on Saturday morning, and on Sunday morning, the other cleared and at 1 o'clock the men began sending messages to Fort Bliss.
